

GHX PROCURE REQUISITION MANAGER

GIVING YOU GREATER
CONTROL OVER YOUR
SUPPLY SPEND

Making it easy for requisitioners to find the right products at the right price can make a big difference to your healthcare procurement.

Over-complicated processes can encourage maverick spending and contract compliance issues. Approvals can get lost in a complex chain of requests, increasing time spent chasing up requests and reducing your ability to efficiently manage supplies.

That's where GHX Procure Requisition Manager can help.

What is GHX Procure Requisition Manager?

Our cloud-based requisition management solution gives you the easy convenience of an online shopping platform, combined with efficient workflow and approval processes.

Staff can quickly find what they need from an approved supply search and submit their request via an easy-to-use approval workflow, saving time and helping hospitals achieve greater control over spend.

By automating your requisition management processes, we can help you:

- ✓ Reduce inefficiencies in your supply chain.
- ✓ Stay on the right side of contract compliance.
- ✓ Reduce the amount of non-file spend.
- ✓ Avoid approval issues that can delay supplies and compromise patient safety.

Find items, approve requisitions and submit your orders in one easy workflow

GHX Procure Requisition Manager provides complete visibility of all your requisitions and approvals, so you can easily identify non-file and off contract purchases, giving you greater control of your overall supply spend.

The user-friendly interface makes it easier for your users to follow approved requisition processes, find the right products with accurate item data and create a full approval workflow that passes directly to your ERP system.

Features and benefits

Intuitive, easy-to-use system designed to help make it easier for all requisitioners to follow approved processes

Set appropriate access, responsibilities and defined product views for each user, to aid guided buying

Increase catalogue purchases to reduce non-file spend and improve contract compliance

Highly advanced and customisable approval workflow, for more flexibility and control over supply spend

Manage approvals via email or mobile app to minimise delays

Easy integration to your ERP as part of your existing procurement process flow

Provides easy access to your NEXUS item master data, giving you the most accurate, up-to-date catalogue and pricing data

Offers a user-friendly item search experience with dynamically maintained shopping and favourites lists

Robust reporting platform with customised spend analytics
